## Mission

It all started many years ago with the dream to build a playground in the Gaza Strip.

The ideal solution seemed to be a standardized container designed by us that was easy to transport and quick to set up. The idea quickly became a prototype for conflict areas all over the world.

And not just there. Wherever there are children, they want to play. Our play containers can satisfy this essential need in the smallest of spaces and in almost any setting – in good times and bad.
